AUDIT PROGRAM

Did you know that FleetwoodGoldcoWyard's Machine and Line Audit Program has the capacity to help extend the life of your equipment and can assist in increasing your production efficiency levels? Our service personnel will inspect and document your equipment's current state, and following our visit provide a detailed written report addressing areas of improvements, repairs, or upgrades that we recommend.

This program is designed to:

- Thoroughly inspect your equipment, and identify and rate based on severity, any issues found.
- Document and recommend any potential safety issues or upgrades.
- Identify and recommend the latest upgrades related to your equipment and review the return on investment.
- Focus on Mechanical, Electrical, Hydraulic, and Pneumatic components.
- Provide you with a detailed report as well as the recommended Spare Parts List.
- Personalized to meet the needs of the personnel and equipment in your plant.

Regardless of the age, make, or model, FGW has the expertise and engineering knowledge to get your machinery running like new again. With today's increased equipment demands and restricted budgets we can help you provide consistent, reliable, and increased production efficiency.

Whether it is a current product or one of our many acquired product lines from I&H, Jetstream Systems, CVC Systems, AMBEC, Simplimatic, Kinetic Systems, or Wiebe, contact us today to enlist a certified product expert. We are the OEM with an entire organization of talent supporting our service engineers. No one else can provide complete OEM drawings, legacy design information, and complete upgrade and repair histories.

We will customize your audit visit in any way we can. Make sure you ask about receiving our special price on an annual maintenance contract following your audit.
