

VersaPal™ L2000 Series Automatic Case Palletizers

Features:

- Floor-level infeed
- Operating speeds up to 40 cases per minute (depending upon layer pattern)
- Heavy duty tubular steel base frame, clean design
- All electric and pneumatic in operation (no hydraulics)
- Space efficient modular design allows for multiple configurations for maximum layout flexibility
- NEMA 12 electrical control cabinet
- Four point lift hoist with #80 pitch chain and encoder controlled vector drive

VersaPal™ L2000 Series Automatic Case Palletizers

Engineered for maximum versatility, FleetwoodGoldcoWyard's FormRite™ infeed and layer forming system employs a unique cyclic infeed technology, to eliminate product damage and to maximize output, while offering flexibility to run a wide variety of columnar and non-columnar patterns. Variable frequency drives ensure precise motion control and sure handling of your product whether in corrugated cartons, plastic trays, or bundled, film-based formats. Additionally, with product infeed at floor-level, production attendants can monitor the palletizing system while performing other tasks, maximizing your return on labor.

Best of all, the VersaPal™ is simple to use. Our exclusive PalLogic™ machine control, together with an easy-to-use touch screen interface, provides complete set-up information and diagnostics. OneTouch™ pattern selection boosts your productivity by storing patterns for multiple products, making changeover quick and repeatable. Furthermore, our DesignedSafe™ integrated safety system enhances safety by combining the benefits of systematic risk assessment with principles of safe design.

Additional features:

- FormRite™ product infeed and layer forming system featuring cyclic feed technology and comprising:
 - Case infeed conveyor
 - Pneumatic case stop
 - Pneumatic case turning device
 - Row/layer forming conveyor
- Stripper plate capable of up to 1000 lb. (453 kg) layer loads
- Pneumatic rear layer retainer
- Manually adjustable layer guides
- DesignedSafe™ integrated safety system, including:
 - Safety interrupt light curtain at full pallet discharge
 - Perimeter safety guarding with inter-locked access door
- Powered pallet conveyor
- Model R06 automatic empty pallet dispenser, with:
 - Single pallet escapement mechanism allowing for free movement of the dispensed pallet
 - Up to 12 pallet capacity (wood or plastic)
- One case pattern included
- 6" color operator interface with OneTouch™ pattern selection
- PalLogic™ machine control system, featuring Allen-Bradley Micrologic programmable controls, with complete set-up information and diagnostics

Optional features:

- Full pallet/unit conveying system
- Additional pre-programmed case patterns
- Pneumatic side layer squaring guides
