

## Paradigm™ Series Low Level Palletizing Systems for PET Containers

### Features:

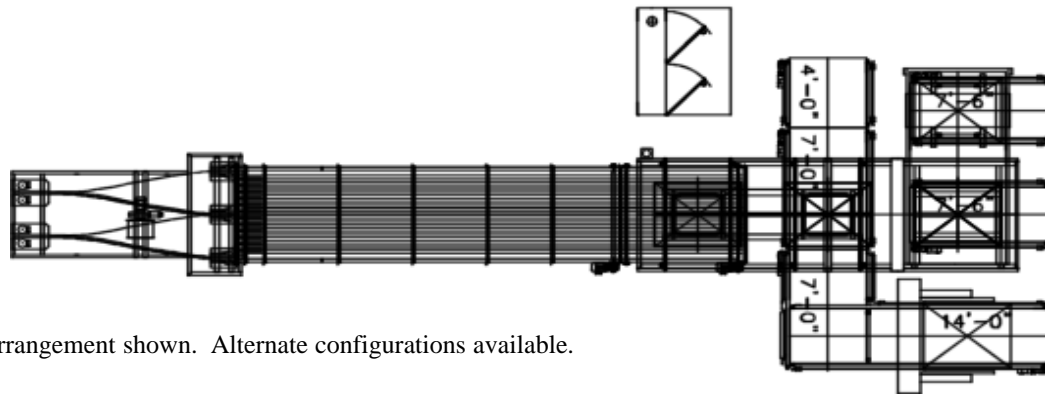

- Multi-laning indexing infeed assembly
- Laned, neck-guided accumulator
- Layer separation assembly
- Servo-driven layer placement assembly with automatic layer indexing
- Servo-driven indexing layer centering assembly
- Automatic layer pad/top frame placement assembly
- Model IS521 layer pad indexing separator
- Model R06 automatic empty pallet magazine
- Empty pallet/load building conveyor with variable frequency drive
- All electric/pneumatic operation
- Color touch-screen operator interface
- Exclusive PalLogic™ machine control and diagnostics system
- NEMA 12 electrical control cabinet
- Integrated safety package

# Barry-Wehmiller

# Paradigm™ Series Low Level Palletizing Systems for PET Containers

Paradigm. The New Model of Productivity.™

A revolutionary cost-effective, productivity-enhancing technology for palletizing empty PET beverage and liquid food containers. Carefully conceptualized, refined and field-tested to meet the rival demands of operating efficiency and packaging diversity, including product change-over in one hour or less.

Typical arrangement shown. Alternate configurations available.

## Flexible

- First true multi-product palletizing system, including 28 and 38mm finish diameters
- Positive, adjustment-free change modules accommodate a broad range of products
- Pre-programmed product settings facilitate system reformatting for a wide range of products in one hour or less, including production restart

## Energy Efficient

- Palletizer-integrated accumulation reduces the need for an accumulating air conveyor, minimizing energy consumption

## Compact

- On average, over 1,000 square feet more compact than other low-level systems
- Capable of replacing high-level systems, using essentially the same floor space

## Productive

- Fastest low-level palletizing system available
- Eliminates the need for dedicated manning, reducing direct labor costs
- Exclusive layer preparation system provides positive container handling to deliver void-free patterns, eliminating container upset and resulting product loss

Contact the experienced sales teams of FleetwoodGoldcoWyard for a comprehensive review of your needs.

NOTE: Safeguarding systems may be disabled, or may not be shown in the images or drawings presented. To avoid injury, these machines/systems must be operated and maintained by only suitably trained and authorized personnel, with all safeguarding systems properly installed, properly maintained, and functioning in the manner intended by the manufacturer.
