

Destrapper (Debander)

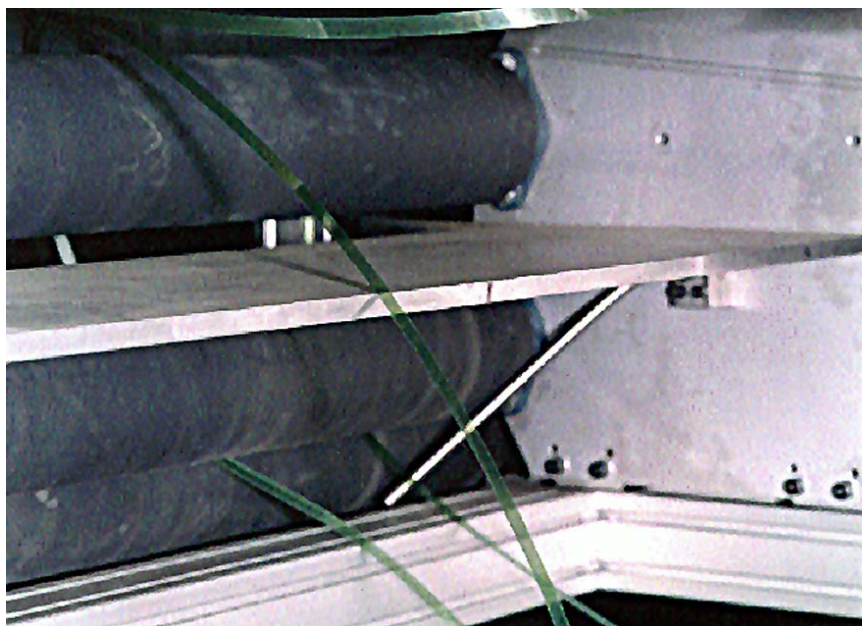

Features:

- Reduced labor costs - eliminates the need for an operator to remove straps and feed them into a chopper before infeed to the depalletizer
- Simple controls allow an operator to set the machine and leave it unattended for extended periods of operation
- The pneumatic and electrical operating system consumes very little power
- Razor sharp knives cut straps into fine, 1/4" or smaller granules for easy disposal
- Pallet heights can vary as much as 6" and still be accommodated .. option available to vary up to 12"
- Cutting head assembly and other areas of the machine is easily accessed for cleaning and maintenance

Barry-Wehmiller

Destrapper (Debander)

FleetwoodGoldcoWyard's Destrapper/Debander operates at the infeed line to a depalletizer and automatically removes the holding straps from pallets of cans, glass and PET bottles and then advances the load to the next station for top frame removal and/or depalletizing, while the straps are processed in a granulator. The Destrapper can also be used on case and other products.

Strap Removal Mechanism - Jam resistant rollers remove cut straps for chopping and disposal.

Features Continued:

- Designed to cut plastic strips
- Top frame positioning device
- Top frame detection
- Strap detection
- Quick disconnect sensors
- Panelview with diagnostics
- Strap granulator with two disposal options:
 - 1) Gravity unloading into a recycle box
 - 2) Vacuum/blower removal to a relocated recycle box

Take the next step toward increased productivity, efficiency and profits. Contact the FGWA sales teams for more information on the Destrapper today!
