Tight Pitch Live Transfer Conveyor Delivers

ROMEDEVILLE, Ill. — February 23, 2011 — FleetwoodGoldcoWyard has just released its latest conveying technology – the Tight Pitch Live Transfer Conveyor. The conveyor was designed for companies running shrink wrap packs, corrugated 4-packs, 6-packs, 8-packs and 12-packs.

Any company running the aforementioned products has almost certainly run into a situation where product has gotten skewed due to product drag on a deadplate. The Tight Pitch Live Transfer Conveyor aims to put an end to that headache.

The conveyor utilizes a 0.3" pitched chain wrapped around a ¼" nosebar to minimize deadplates from chain-to-chain transfers – helping to eliminate product skewing. The conveyor is designed to be driven off an existing chain with no need for a motor and is also available as a standalone conveyor.

Contact FleetwoodGoldcoWyard to review your conveying needs and to find out how your company can benefit from the Tight Pitch Live Transfer Conveyor.

About FleetwoodGoldcoWyard

FleetwoodGoldcoWyard, Inc. is a global packaging machinery firm serving the food, beer and beverage, container manufacturing, personal care, pharmaceutical and household products industries. Its complete range of integrated product solutions includes automated can end and product handling systems, advanced conveyance technology, robotic technology, palletizers, depalletizers, and process equipment.
